Description

A Hat in Time is a cute-as-heck 3D platformer featuring a little girl who stitches hats for wicked powers! Freely explore giant worlds and recover Time Pieces to travel to new heights!

You'll play as a tiny space-travelling girl with a big tophat. Her adventure is halted when all her fuel, the Time Pieces, is lost and scattered across a nearby planet. Hat Kid must now jump, fight and stitch new hats to make her way into every nook and cranny of this new world in order to restore her fuel and resume her journey.

On her way, she'll bump into the menacing Mafia of Cooks, the goofy birds of Dead Bird Studio, the spooky shadows of Subcon Forest, and more!

A Hat in Time was successfully funded on Kickstarter, reaching nearly 10 times its goal! In order to celebrate our community, A Hat in Time is releasing with full modding and Steam Workshop support, an in-game screenshot mode, and more!

Features

- Five Massive Worlds
- Single Player
- Six Hats with unique abilities
- 40 Collectable Timepieces
- Split Screen/Shared Screen Co-Op
- A variety of unlockable cosmetics.

Gears for Breakfast

Gears for Breakfast began as a small team setting out to make a game inspired by the games we grew up with.

Our mission is to produce unique and captivating experiences to any person who plays a game from Gears for Breakfast. We are a global company in the truest sense of the word, with members working from across the world. This collection of skill and talent brings us perspectives from a variety of cultures and backgrounds.
